## Real Time Temperature Data Logger -90 to +140°C

- + Collects and transmits real time temperature to XpertLog Software
- + ITS-90 calibration coefficients are stored in the internal memory
- + Complies with FDA 21 CFR Part 11
- + Network ready: multiple users, centralized, server database, active directory authentication
- + Calibration can be performed on site
- + Can be remotely activated

Sensor type	4 wires PT-100
- flexible	480 mm (19")
- customized	Up to 5000 mm (195")
- sensor size	1.5 x 8 mm (0.06 x 0.315")
- cross section	1.77 mm <sup>2</sup> (0.0027 inch <sup>2</sup> )
Operating Range	
- body temp.	-90°C to +140°C
- sensor temp.	-200°C to +200°C
Accuracy	±0.1°C from -90 to +140°C
Resolution	0.01°C
Memory capacity	32,000 data points
Sampling rate	1 sec to 24 hours
Transmission	Simultaneous: maximum 20 loggers
	Sequential: unlimited
Internal clock Drift	4 sec / 24 h @ + 23 °C

Mechanical	
- material	Peek 1000 - FDA compliant
- enclosure	IP-68
- weight	115 g (4.06 oz)
- diameter	65 mm (2.56")
- height	55 mm (2.17")

Power	2 x Lithium batteries, 0.35 g/each content classified UN3091 under IATA DGR section 3.9.2.6 compliant with ICAO/IATA packing instruction 970 user replaceable
Battery lifetime	Up to 6 months, based on usage
Antenna	Internal
Wireless range	121 m (400')
Radio frequency	2.4 GHz ISM band
Access point	USB to computer

Programs and reads unlimited number of loggers

## ALUS System Data Logger -90 to +140°C

The Lyo Caterpillar system is designed to offer full integration of real time data loggers with the automatic loading and unloading systems used with lyophilizers .

This system is composed of three different parts:

- The first part is the RF real time data logger that stores and transmits the temperature data
- The second part is a buffer vial
- The third piece is the vial containing the product where the temperature is to be measured.

The Lyo Caterpillar holds the three pieces together, allowing the whole system to move freely on the belt during the automatic loading and unloading process.

The temperature sensor is very small and has thin gauge sensor wire which combined result in the absolute minimum of influence on the process during the measurement. The sensor is held securely in position by the sensor holder thus allowing very accurate temperature measurement in the critical location at the bottom of the vial.

The buffer vial between the data logger and the measurement vial eliminates completely the influence of the data logger body during the measurement.

The materials of construction allow the Lyo Caterpillar to be used continuously at temperatures up to 250 °C / 482 °F and can be sterilized in steam autoclaves or in hydrogen peroxide.

The Lyo Caterpillar system comes by in default sizes of 10R or 30R vials and can be customized for different sized vials depending on users requirements.

## Thermal Validation and Mapping Services

by Lives International

- >> Thermal validation expertise
- >> Fast project turnaround
- >> Training cost avoidance
- >> The newest technology available
- >> Quick response
- >> Large equipment inventory

As a manufacturer of advanced validation systems for temperature, humidity and pressure analysis, Lives International holds impressive equipment inventory and can quickly respond to service requests involving large amounts of test points.

With over 15 years of experience in the field, Lives International has the expertise required for any thermal validation project.

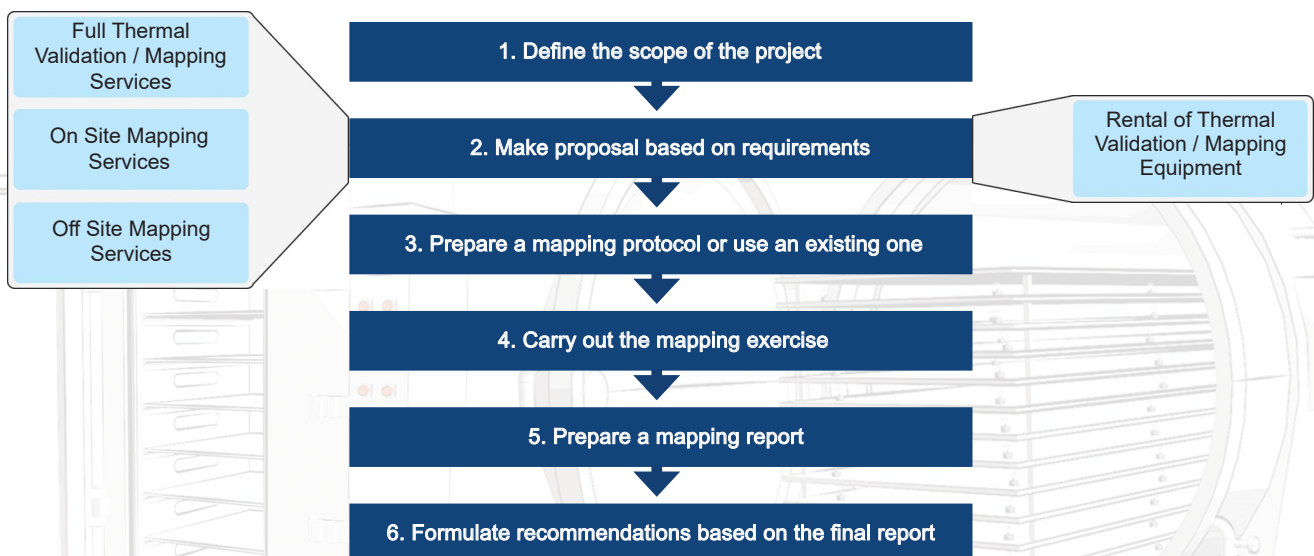

Our validation engineers are trained on Lives proprietary thermal validation system technology, avoiding training cost and providing a fast project turnaround.

We provide subject matter experts and proprietary technology to perform regulatory compliant thermal validations / mappings of the following equipment (non-exhaustive list):

## Thermocouple systems

- + Conventional Tc's based system for thermal mapping and validation
- + 60 (up to 120) channels simultaneously
- + Rugged data logger used in industrial harsh environment, real time data display
- + High accuracy Tc after pre-calibration ( $\pm 0.2^{\circ}\text{C}$ )
- + Complies with FDA 21 CFR Part 11
- + Network ready: multiple users, centralized, server database

Sensors	Thermocouples
Sensor length	- standard: 10 m (33 feet) - customizable: custom length
Sensor type	All type of thermocouples, most used : T, J, K
Temperature range	- teflon: $-200^{\circ}\text{C}$ to $+200^{\circ}\text{C}$ - kapton: $-200^{\circ}\text{C}$ to $+400^{\circ}\text{C}$ - others: up to $+1200^{\circ}\text{C}$
Accuracy	$\pm 0.2^{\circ}\text{C}$ after pre-calibration
Memory capacity	Internal memory: 20 Mb Backup memory: USB storage device compatible
Tc Tip	Teflon: teflon tip to prevent moisture on the wire Kapton: no tip
Sampling rate	120 channels - 5 sec 60 channels - 5 sec 20 channels - 2 sec 12 channels - 1 sec
Software	21 CFR Part 11
Module	Universal input module: 4 - 20 mA / 0-10 V / RTD (PT-100 2, 3 or 4 wires), thermocouples
Communication	USB XpertVal to PC LAN 2.4 GHz, 802.11b/g/n
Close loop calibration	Required when using thermocouples for thermal validation System uses temperature block and reference probe, software controlled reports generated automatically by the software
Reference probes	RTD, Fluke 1502, Lives XpertRTD
Dry blocks	Lives : PTC 125 : $-90^{\circ}\text{C}$ to $+125^{\circ}\text{C}$ / RTC 157 : $-45^{\circ}\text{C}$ to $+155^{\circ}\text{C}$ / RTC 159 : $-100^{\circ}\text{C}$ to $+155^{\circ}\text{C}$ RTC 700 : $+23^{\circ}\text{C}$ to $+700^{\circ}\text{C}$ Fluke 9190: $-90^{\circ}\text{C}$ to $+140^{\circ}\text{C}$ ; Fluke 9170: $-45^{\circ}\text{C}$ to $+140^{\circ}\text{C}$ ; Fluke 9172: $+35^{\circ}\text{C}$ to $+425^{\circ}\text{C}$

## IRTD Display Interface Unit

Stand alone display and interface between smart probes and Lives International Systems

- user selectable engineering units display:  
°C, F, K and Ohm
- calculates and displays the minimum and maximum temperature values
- USB connection to XpertLog® systems
- radio frequency signal transmission to XpertLog® systems
- radio frequency transmission: 2.4 GHz
- wireless range: 400 feet (121m) line of sight
- automatic address detection of the smart probes
- weight: 0.66 lb. (300 gr.)
- RJ14 connection to Smart Probe / connectable to Validator
- easy-to-read display with perfect overview of the actual status
- state of the art design
- power supply: 12 V DC

# XpertLog SCADA

## Interface Real Time Data Loggers with SCADA/HMI

Purpose:	Interface XpertLog® real time data loggers with the SCADA/HMI of any equipment Display XpertLog® real time data on SCADA / HMI	
Applications:	Interface SCADA/HMI of autoclaves, freeze dryers, etc. with XpertLog® real time data loggers inside the equipment. Can be used to control the equipment based on Real Time Wireless Data Loggers*	
Scope:	Help users to meet FDA requirements with regards to Continued Process Verification Gain ongoing assurance during routine production that the process remains in a state of control Minimize time needed for parametric release of a sterile load after sterilization cycle Display real time behavior of the equipment using a third party system - XpertLog® Detect real time anomalies of product probes and allow users to take action	
Functionality:	Collect temperatures/pressures from XpertLog® real time data loggers and display simultaneously with the product probes on the SCADA/HMI <small>* applies under conditions, call to discuss application and implementation</small>	
Minimum recommended acquisition interval	10 sec	
Maximum number of loggers	20	
Accuracy		
- temperature	± 0.1°C	
- pressure	± 10 mbar @ 2 bar abs	
Resolution	0.01°C; 0.1 mbar	
Data integrity	21 CFR Part 11 compliant	
PLC compatibility	Any PLC	
Measurement range		
- temperature	-60 to 140°C	
- pressure	0.01 to 5 bar abs.	
Memory capacity	32,000 data points -16,000 p / 16,000 temp.	
Battery lifetime	Up to 6 months, based on usage	
Internal clock drift	4 sec / 24 h @ +23°C	
Access Point	USB connection	
Material	Peek 1000 - FDA compliant	
Radio frequency	2.4 GHz ISM band	
Enclosure	IP-68	
Calibrations	Factory:	Traceable NIST / COFRAC - ITS-90 coefficients stored in the internal memory
	User:	Close loop calibration, using XpertLog® Software
Certification	EMC:	EN 60601-1-2 / 2007
	RF:	EN 300440-2 v1.3.1 (2009-03)
	Health Safety:	EN 60950-1/2006

# XpertLog Software

Connect All Your Equipment To One Software

## Features:

- **create reliable reports** - all calculations are performed after the data is downloaded from the loggers
- **split the raw data** stored inside loggers during several tests in as many tests as performed
- **create:**
  - raw data reports and F value reports
  - trend reports
  - statistic reports
  - image reports
  - steam saturation reports
  - calibration certificate report
  - 3D reports
- **assign verifications** at the performed tests
- **create custom calculations** using the "Virtual Channels"
- **add comments** in the header of the reports
- centralized database, active directory authentication

## USB communication with:

- data loggers
- temperature blocks
- reference probes

- calibration / verification of the sensors before running a test
- verification of the loggers after running a test
- fully automated calibration - the calibration equipment controlled by the software

- use of templates to create final reports
- create a library of users / organizations
- create acceptance criteria templates
- create a library of equipments
- generate final reports
- all the reports generated by the software merged in one single report
- table of contents
- conclusion of the report in the first page
- acceptance criteria
- summary of the results
- 3D view
- trends
- steam saturation

Remotely control your cold chain shipments  
Prevents drug shortage  
Allows you to control shipments integrity

- + Collects and stores temperature, position, light exposure and shocks data in the internal memory
- + Alarms are triggered when your products exceed the allowed temperature, light exposure and shocks during shipments
- + Geo-fencing (user definable)
- + Instantaneously detect if your shipment has been tampered with display the current position and temperature of your container
- + Complies with FDA 21 CFR Part 11

## PTC Dry Blocks

The PTC Series matches lab features like a wide temperature range, high accuracy, stability, and speed. The PTC Series features an active dual zone temperature control which provides excellent temperature homogeneity in the well.

This PTC series is included in the close loop calibration feature provided by Xpertlog software.

All PTC dry blocks are delivered with carrying case with trolley. Insert is not included.

## RTC Dry Blocks

Lives International includes the most advanced and accurate temperature calibrators from Ametek in our thermal validation system. Xpertlog software controls the temperature blocks and reference probes during close loop calibrations. The calibration report is automatically generated after a calibration, contains the Id of the blocks and reference probes.

The RTC Series also feature active dual - and triple - zone temperature control which provides excellent temperature homogeneity in the well.

All RTC dry blocks are delivered with carrying case with trolley. Insert is not included.

All C models ( ex RTC-157C) include an internal ref. probe and an external with 90° angled and 4 mm diameter.

## Temperature Calibration Products

### Oil baths

Lives International provides temperature calibration and oil bath under OEM agreement with Fluke. They offer unsurpassed stability and uniformity, a large working volume, and flexibility for performing thermometer calibration or calibrating a variety of temperature sensors. Our Calibration temperature baths include: compact, deep-well, hot, cold, resistor, and custom baths.

Name	Reference	Temperature range	Stability	Weight
Hart Oil Bath	7320	-20 °C to 150 °C (-4 °F to 302 °F)	± 0.005 °C	35.4 kg
Hart Oil Bath	7340	-40 °C to 150 °C (-40 °F to 302 °F)	± 0.005 °C	35.4 kg
Hart Oil Bath	7380	-80 °C to 100 °C (-112 °F to 212 °F)	± 0.006 °C	52 kg

### Dry blocks

Dry-block calibrators (dry-wells) and Micro-Baths are precision temperature sources that provide stable and uniform temperature environments for calibrating temperature sensors, thermometers, and thermal switches. We offer a variety of dry-block calibrators and Micro-Baths with high accuracy, wide temperature range, speed to temperature, interchangeable inserts, and the ability to read reference probes, thermal switches, and 4-20 mA output from temperature transmitters.
